### DETAILED ACTION

Claims 1-39 are pending in the application.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 37-39, drawn to the compounds, compositions and method of use of the compounds of formula II, classified in classes 546 and 548, various subclasses within.
- II. Claims 1-8, 16-22 and 37-39, drawn to the compounds, compositions and method of use of the compounds of formula III, classified in classes 546 and 548, various subclasses within.
- III. Claims 1-8, 23-29 and 37-39, drawn to the compounds, compositions and method of use of the compounds of formula IV, classified in classes 546 and 548, various subclasses within.
- IV. Claims 1-8 and 30-39, drawn to the compounds, compositions and method of use of the compounds of formula V, classified in classes 546 and 548, various subclasses within.

The inventions are distinct, each from the other because of the following reasons:  
Groups I-IV are directed to structurally dissimilar compounds such that the variable core created by the varying definition of P in formula I do not belong to a recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others, for example 3-oxa-2-aza-benzo[e]azulen-8-yl is different from 3-thia-1-aza-benzo[f]azulen-7-yl, 3-oxa-2-aza-benzo[e]azulen-9-yl, 3-thia-1-aza-

benzo[f]azulen-6-yl, etc. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

**Tentative election of a single species within the elected group is further required.**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
